

June 18, 2019

Dear Parents/Guardians and students,

The summer assignment for students entering 4th, 5th, and 6th grade is used to practice grade level objectives and to improve math performance with word problems. The assignment will be posted on Google Classroom and the school website and will be available throughout the summer. There are 50 multiple choice questions. Each student has received a bubble answer sheet to put their multiple-choice answer on. It is up to the student if they want to print out the assignment and show their work on there or they can show their work on a separate sheet of paper. Please number the work with question it corresponds to. The math teacher will be collecting the assignments on the **FIRST FULL DAY** of school. It is important that you make sure your child does their absolute best on this assessment, so the math teachers can see where skills need to be reinforced. Have a wonderful summer.

As an extra incentive, if your child brings in 3 Mathletics certificates on the first day of school, they will receive 5 bonus points that can be used on an assignment in the first trimester.

Sincerely,
4th, 5th, and 6th Math Teachers
