

Summer Assignment for Incoming Second Graders

Dear Second Grade Parents,

To keep your child learning and engaged over the summer please find the following assignments.

For Language Arts, it is recommended that your child practice the memory words they have learned in Kindergarten and First Grade. I have included a copy of all the words they should know in Second grade. The knowledge of these words will increase fluency. I have also included a Summer Reading Challenge and book list with some fun ways to read and exercise your brain.

To sharpen their Math skills practice and memorize math and subtraction facts to twenty. You can either buy math flash cards or make your own.

If you want to do more with your child you could purchase Reading and Math books from Lakeshore Learning. There are also many educational websites to practice their skills.

Thank you for your cooperation. Have a great summer.

Sincerely,

Mrs. Carmela Raffetto
