

Hello Parents,

Happy Summer! This year's summer assignment is to log your child into Freckle with the login information provided and complete the given assignments in both Math and ELA. My summer goal for each of your children is that they come in with an understanding of basic multiplication facts 0-10 and basic writing skills (how to write a complete sentence and form paragraphs).

Freckle is an adaptive learning program, please monitor your child's progress and help them achieve and maintain goals mastering their second grade academic year. With these skills mastered it will make for an easier transition into a very academic third grade experience. This summer assignment is just a snippet of the work that they will be completing during the actual school year. Please keep them working over the summer in preparation for a very rigorous third grade year. I look forward to working with you and your children this 2022-23 academic year.

Have a happy and healthy much needed summer vacation!

See you in September,
Ms. Sweeney
